WASHINGTON, D. C.

THE TREES OFFERED are all healthy and thrifty, and are better rooted than those grown on heavier soil.

We have never had any yellows in this locality, neither have we had any San Jose scale. See certificate of inspection below.

Everything fumigated before shipment.

Mistakes of mine promptly corrected, if I am notified within ten days of receipt of goods.

Terms, **cash with order**, unless otherwise specially agreed upon.

Remit by registered letter, post office order, or draft on New York or Philadelphia, and not by personal checks. If personal check is sent, add 25c. for collection.

Parties ordering goods C. O. D. must expect to pay return charges on the money, and remit one-third of the amount with the order.

In some cases, when I am out of varieties called for, I substitute other varieties as nearly like those called for as possible, unless forbidden.

Spring shipments begin as soon as weather opens, and trees are kept dormant so as to ship at any time wanted, even as late as the 15th of May.

Guarantee of Genuineness

While I exercise the greatest diligence and care to have all my trees, etc. true to label, and hold myself in readiness, on proper proof, to replace all trees, etc. that may prove untrue to label, free of charge, or refund the amount paid, it is mutually understood and agreed to between the purchaser and myself that my guarantee of genuineness shall in no way make me liable for any sum greater than that originally received for said trees, etc. that prove untrue.

Certificate of Nursery Inspection

Dover, Delaware, Sept. 21, 1904.

To Whom It May Concern :

This certifies that I have this day examined the nursery stock and premises of the Sussex Nurseries, of R. S. Johnston, at Stockley, Sussex County, Delaware, and that said nursery stock is apparently free from crown gall, peach yellows, peach rosette, the San Jose scale, and all other plant diseases and insects of a seriously dangerous nature.

This certificate may be revoked by the State Board of Agriculture for cause, and it is invalid after August 31, 1905, and does not include nursery stock not grown on the above named premises, unless such stock is covered by certificate of a state or government officer and accepted by the State Board of Agriculture.

WESLEY WEBB, Inspector.

Grade of Peach Trees

The term "No. 1," "Medium," and "Nos. 2, 3 and 4," refer to the size only. As regards vigor and ability to grow, the trees are **No. 1 in each grade**, and will thrive equally well with proper care. The No. 4 are mostly those of larger sizes that have been shortened in on account of being crooked, the crooked portion being cut off.
